

## Service Menu

Liquid Keratin is a formaldehyde, aldehyde free keratin system that offers custom results and safety for clients and stylists. Wash out the same day and get back to your routine, and colour the same day too. LK is progressive: the more often you have the service, the longer lasting the results - and the better your hair looks. LK is far from your "traditional" keratin treatment!

Do you want stronger, smoother, longer hair? Whatever your hair needs, Liquid Keratin has a customized service just for you. In fact, you're one complementary consultation away from having the hair of your dreams . . .
